Teikyo University Graduate School of Public Health

Harvard Special Session 2018

January, 2018

Every January Teikyo has invited five professors from Harvard University, University of Cambridge, University of Oxford and Durham University to provide intensive courses of lectures for our graduate program of public health since 2012 when the school program commenced. The courses cover five frames required by the Council of Education for Public Health: *Epidemiology, Biostatistics, Environmental Health Sciences, Health Policy and Management, and Social and Behavioral Sciences.*

As the abridged version of the lectures of Harvard School of Public Health, the certificates authorized by professors of both Teikyo and Harvard University are issued to students upon completion of these courses. This special session is a part of academic collaborations which both institutes have continued since 1993.

The past four sessions attracted students from the United States and Asian countries such as Thailand, Philippines, Indonesia, and China, and they brought a global atmosphere to classroom. We welcome and look forward to having participants from various countries.

We will accept applications from October.
